# CulturesConnect.me web based app programmed with bubble.io

Above user profile signup fields are visible during the creation of a user profile. There is one more question we would like to add during profile creation : My favorite ethnic dish (text field) [to be inserted before the About me field]

Also, we now want to expand the available attributes for the My Interests field, and offer users a dating option (for a subscription fee). I am not sure how to solve this best …

At this point I am thinking this might be the way to go: Changing the current display of my interest options to be displayed as check boxes with an added attribute "Dating"

If user selects "Dating" as one of the options then the following choices will be displayed (and the previous profile information will automatically be saved).

My Dating Profile

Year of birth: [to be selected from list] and if younger than 18th user can not continue and will be taken directly to the home page]

[The following options to be displayed as check boxes (for users to be able to select more then one]

Gender: woman, man, trans woman, trans man, nonbinary, bigender, pansexual, queer, other (maybe a free text field?)

Sexuality: straight, lesbian, gay, bisexual, asexual, demisexual, pansexual, queer, questioning, other (maybe a text field?)

Desired Relationship: sexual encounters, casual dating, committed relationships, other (maybe a text field?)

Subscription length; 1 month   3 months   6 months   12 months

Payment module [in an outside stripe api similar to the existing one for businesses]

Of course, once we collect dating info we also need to give users the option to search for 'partners' in the search window.

One possible solution - the following structure (but maybe there are better ones)

Search for (select one - through radio buttons)

All Users   Dating Partners   Service Providers

Further search criteria are a function of the above section My Dating Profile.

Users : Country Natives, Global Nomads (radio buttons) / Name (text field), Country (list options), Language (list options), Keyword (text field)

Dating Partners (as above check boxes) : Desired Relationship (check boxes) / Gender (check boxes) / Sexuality (check boxes)

Service Providers: Category (list), Country (list), Keyword (text box)

Results are to be always sorted by distance from the currently signed in user.
